Claude Build Day Participant Guide 🧑🧑

Welcome to the Claude Build Day! 🙌 We're thrilled to have you on board.

This guide is your all-in-one resource for the event, including schedule, rules, technical resources, problem statements, judging information, and more. Please read this carefully; most answers can be found here.

1 Your Goal – Hackathon Problem Statement

Build something new, such as a complete, working app from a standing start. Or bring your product and point Claude at the biggest problem it's facing. Feel free to leverage dynamic workflows or other orchestration features, and let Claude carry the work. You'll get credits to cover tokens for the entire Build Day.

1. **Start with a clear brief.** What's the problem, who is it for, and what does done look like?
2. **Kick it off.** Spend time briefing Claude: point it at your repo, answer its questions, set up your goal and rubric. Then let it go.

3. **Ship.** Deploy to a live URL and submit it with your brief, your rubric, and the session log.

Pick a problem worth solving

A few thought starters:

- Ship your product somewhere you've never shipped: mobile, desktop, CLI.
- The tool San Francisco or a nonprofit you love deserves, built on the public data they already publish.
- A claims, loan-servicing, or back-office workflow that takes weeks today.
- The redesign your product has needed for a year.
- The swarm: point a team of agents at your real backlog, ship the release, and demo what's new.

Scoring Criteria:

- Impact (35%): What's the real-world potential here? Who benefits, and how much does it matter? Could this actually become something people use? Does it fit into one of the problem statements listed above?
- Demo (35%): Is it a working and impressive demo? Does it hold up live? Does the demo prove the impact?
- Opus 4.8 Use (15%): How creatively did this team use Opus 4.8? Did they go beyond a basic integration? Did they surface capabilities that surprised even us?

- **Orchestration (15%):** Judged from the submitted brief, rubric, and any workflow scripts (not from which features were used). Is this orchestration simple and repeatable? Is "done" verifiable by the model without a human: a test suite, a responding URL, a rubric file it can grade against? Could another team rerun the setup tomorrow on a new problem?

Resources:

- **Primary Resources**
 - [A harness for every task: dynamic workflows in Claude Code](#)

2 Getting Ready – Location & Arrival

📍 Location: Shack15 (Ferry Building, 1, Suite 201, San Francisco, CA 94111)

Arrival Instructions

Due to high demand and limited capacity, please arrive at 9:00 AM when doors open. Bring your ID for check-in on the second floor. You will receive a name tag and a wristband, which must be worn at all times in the venue.

Wi-Fi Access

SSID: Claude Build Day

Password: problemsolvers

Getting Here

Public Transit (recommended): Take BART or Muni to the Embarcadero station — it's a 2-minute walk from there. The Ferry Building is also served by the F-Market streetcar and several Muni bus lines. SF-bound ferries from Oakland, Alameda, and Sausalito arrive right at the Ferry Building.

Rideshare & Wymo: Set your destination to "Ferry Building." Drop-off and pick-up are on The Embarcadero, directly in front of the building.

Parking: Limited paid parking is available in the Ferry Building garage (entrance on Washington St), with the Pier 1 lot as the nearest alternative. You can also check [SpotHero](#) for availability at nearby lots.

Parking is limited — we strongly recommend taking public transit or rideshare.

3 Connect with the Community - Discord

Join us on Discord to meet other participants, get official updates, begin forming teams:

Getting Started:

- Join the Claude Discord server [here](#)

Join the Claude Discord Server!

Check out the Claude community on Discord - hang out with 1050...

 <https://discord.com/invite/6P...>

- **Please note:** We will assign a custom role to your account so you will be able to see the hackathon specific channels.
- **Introduce yourself:** In #intros, share who you are, the skills you bring, and what project you're looking to build.
- **Create a Team:** In #team-search, find teammates before the hackathon (maximum team size of four)

Key Channels:

- #general: Socialize and meet other hackers.
- #rules: On the day rules spanning from registration, product building, and pitching.
- #announcements: Official updates and reminders from the CV Team.
- #intros: Introduce yourself and what you're doing to everyone!
- #team-search: Find teammates before the hackathon (maximum team size of **four**).
- #questions: Ask any general questions to the CV and Anthropic team..
- #social: Share your hackathon posts for other participants to reshare/interact!
- #credit-questions: Request support from the CV team on obtaining your \$500 in Claude API credits.

- Pick a post below (we've got X options + a LinkedIn one) — feel free to make it your own.
- Tag @claudeai, @claude devs, and @cerebral_valley
- Attach the "Claude Build Day" graphic to your post — it works on both X and LinkedIn.

Posting to Twitter/X

Building with Claude Code today as part of @claudeai, @claude devs, and @cerebral_valley's Claude Build Day.

<Describe what you're building here>

Posting to LinkedIn

I'm participating in the Live Claude Build Day with Anthropic and Cerebral Valley. It's a one-day challenge to build something with Claude Code and I'm building <describe here>!

5 Schedule Overview

- **9:00 AM:** Doors Open & Breakfast – *please arrive promptly!*
- **10:00 AM:** Welcome & Kick-Off
- **10:30 AM:** Hackathon Begins
- **1:00 PM:** Lunch
- **5:00 PM:** Submissions Due

- **6:15 PM:** Finalists Announced – *please be respectful as teams demo!*
- **7:45 PM:** Winners Announced
- **7:45–10:00 PM:** Closing Celebration – *beverages and dinner served*
- **10:00 PM:** Doors Close

6 Hackathon Rules

- **Open Source:** Project repositories must be public.
- **Team Size:** A maximum of four team members per team. Solo participants are allowed.
- **Demo Requirements:** Your demo must only highlight the specific features, code, and functionality that your team built during the hackathon.
 - Judges must be able to clearly identify what was created during the event.
 - Failure to clearly identify your original contributions will result in immediate disqualification.
- **Technologies & Projects:** You're welcome to bring in prior projects to augment with the use of Claude during the hackathon.
- **Own Work:** Failure to clearly distinguish your contributions will result in immediate disqualification.
- **Banned Projects:** Projects will be disqualified if they: violate legal, ethical, or platform policies, use code, data, or assets you do not have the rights to.

Prohibited Projects — STRICTLY NO:

- AI Mental Health Advisor
- Basic RAG Applications
- Streamlit Applications
- Image Analyzers
- “AI for Education” Chatbot
- AI Job Application Screener
- AI Nutrition Coach
- Personality Analyzers
- Medical advice bots
- Any project where a dashboard is the main feature
- Sports analyzers or coaches
- Projects will be disqualified if they: violate legal, ethical, or platform policies, use code, data, or assets you do not have the rights to.

7 Claude-Provided Resources

\$500 in credits, with 24hr expiry. Link to credits will be provided day of event

Code

8 Submission Process

Teams should submit [here](#) at **5:00 PM sharp**. In the submission form, you will submit a short one minute demo video. This should be a video highlighting the specific features, code, and functionality that your team built during the hackathon.

Please double check that your build repository is public, your demo link is accessible, and all team members have been added to the submission page.

A Note to Founders/Startups:

We understand that some of you are building with existing products. You're welcome to extend what you may already have built, but the final submission to this hackathon must be an **open source public GitHub repository containing any and all code that you present in your demo** to allow our team and Anthropic's team to review.

This means that your project must be a standalone product or tangential feature that can be extracted into a separate repository and shared with us. The GitHub

links will be kept internal to our judging team and never shared publicly.

9 Judging Process

Judging will take place in two rounds.

Round One: Submissions will be reviewed asynchronously by the Anthropic team based on the materials submitted, including your demo video and GitHub repository. Finalist teams will be selected from this review.

Round Two: Top 6 teams will present on stage to a panel of judges & all attendees. Each team will have 3 minutes to live demo their project, followed by 1-2 minutes of Q&A. The same criteria as above will be used, though with equal weighting for each category.

Round 2 presentation format: Presentations should be 3 minutes long showcasing what you built. Please use the following slide as your only slide (introducing your team). Link below 📌

[EXTERNAL] Demo Introduction Slide

[Team name] Built with [Team Member 1, Team Member 2, Team Member 3,...

📄 <https://docs.google.com/presentation...>

[Team name]

Team Member 1, Team Member 2, Team Member 3, Team Member 4

What you built? (1 line)

How you built? (1-2 lines, focus on impact, autonomy, and orchestration)

Claude

Any other slides are discouraged - we want to see what you built (code and product on screen), how you built it,

and the problem you're solving. In your presentation, you should show how you directed Claude and how it verified its own work: walk us through what you gave the model (your brief, rubric, tests, or workflow scripts) and, if you can, the moment it caught and fixed a failure on its own.

Prizes

First Place: \$100,000 API credits

Second Place: \$40,000 API credits

Third Place: \$10,000 API credits
